

TWELVE INCH FEATHER CIRCLE

Take a piece of heavy paper about 14 inches square. Divide into quarters by straight lines. In each quarter, trace the section given here. This will make a complete circle in 12-inch size.

FRIENDSHIP DAHLIA

Eight different prints make this flower, to be appliqued on a 14-inch square of white. Crease to find the center and place eight petals around it, lapping from the small notch to the center. These are appliqued and the yellow circle added. Stems are made of 3/4-inch bias

material. For a quilt about 78x92", a 4-inch border and 30 blocks are required. You will need about 6 yds. white, 1/4 yd. green, 1/6 yd. yellow, 1 yd. for border and 15 inches of each of eight prints.
